Title

Contents

Chapter 1 The Long and Short of

When You Enter the Job Market can Matter a Lot

1.1 What Macroeconomics Is About

Macroeconomics in the Short Run and in the Long Run

Long-Run Growth in the United States

Some Countries Have Not Experienced Significant Long-Run Growth

Aging Populations Pose a Challenge to Governments Around the World

Unemployment in the United States

Unemployment Rates Differ Across Developed Countries

Inflation Rates Fluctuate Over Time and Across Countries

Economic Policy Can Help Stabilize the Economy

International Factors Have Become Increasingly Important in Explaining
Macroeconomic Events

1.2 How Economists Think About Macroeconomics

What Is the Best Way to Analyze Macroeconomic Issues?

Macroeconomic Models

Solved Problem 1.2: Do Rising Imports Lead to a Permanent Reduction in U.S.
Employment?

Assumptions, Endogenous Variables, and Exogenous Variables in Economic Models

Forming and Testing Hypotheses in Economic Models

Making the Connection: Why Should the United States Worry About the Euro
Crisis?

1.3 Key Issues and Questions of Macroeconomics

Key Terms and Problems

Key Terms and Concepts, Review Questions

Problems and Applications, Data Exercise

Chapter 2 Measuring the Macroeconomy

How Do We Know When We Are in a Recession?

Key Issue and Question

2.1 GDP: Measuring Total Production and Total Income

How the Government Calculates GDP

Production and Income

The Circular Flow of Income

An Example of Measuring GDP

National Income Identities and the Components of GDP

Table of Contents

The Relationship Between GDP and GNP

GDP Versus GDI

GDP and National Income

2.2 Real GDP, Nominal GDP, and the GDP Deflator

Solved Problem 2.2A: Calculating Real GDP

Price Indexes and the GDP Deflator

Solved Problem 2.2B: Calculating the Inflation Rate

The Chain-Weighted Measure of Real GDP

Making the Connection: Trying to Hit a Moving Target: Forecasting with Real-Time Data

Comparing GDP Across Countries

Making the Connection: The Incredible Shrinking Chinese Economy

2.3 Inflation Rates and Interest Rates

The Consumer Price Index

Making the Connection: Does the CPI Provide a Good Measure of Inflation for a Family with College Students?

How Accurate Is the CPI?

The Way the Federal Reserve Measures Inflation

Interest Rates

2.4 Measuring Employment and Unemployment

Answering the Key Question

Key Terms and Problems

Key Terms and Concepts, Review Questions

Problems and Applications, Data Exercise

Chapter 3 The U.S. Financial System

The Wonderful World of Credit

Key Issue and Question

3.1 An Overview of the Financial System

Financial Markets and Financial Intermediaries

Making the Connection: The Controversial World of Subprime Lending

Making the Connection: Investing in the Worldwide Stock Market

Banking and Securitization

Asymmetric Information and Principal-Agent Problems in Financial Markets

3.2 Financial Crises, Government Policy, and the Financial System

Financial Intermediaries and Leverage

Bank Panics

Government Policies to Deal with Bank Panics

The Financial Crisis of 2007-2009

The Mortgage Market and the Subprime Lending Disaster

Runs on the Shadow Banking System

Government Policies to Deal with the Financial Crisis of 2007-2009

Table of Contents

Making the Connection: Fed Policy During Panics, Then and Now: The Collapse of the Bank of United States in 1930 and the Collapse of Lehman Brothers in 2008

3.3 The Money Market and the Risk Structure and Term Structure of Interest Rates

The Demand and Supply of Money

Shifts in the Money Demand Curve

Equilibrium in the Money Market

Calculating Bond Interest Rates and the Concept of Present Value

Present Value and the Prices of Stocks and Bonds

Solved Problem 3.3: Interest Rates and Treasury Bond Prices

The Economy's Many Interest Rates

Answering the Key Question

Appendix: More on the Term Structure of Interest Rates

Key Terms and Problems

Key Terms and Concepts, Review Questions

Problems and Applications, Data Exercise

Chapter 4 The Global Financial System

Did U.S. Monetary Policy Slow Brazil's Growth?

Key Issue and Question

4.1 The Balance of Payments

The Current Account

The Financial Account

The Capital Account

4.2 Exchange Rates and Exchange Rate Policy

Nominal Exchange Rates

Real Exchange Rates

The Foreign-Exchange Market

Exchange Rate Policy

Policy Choices and the Current Exchange Rate Systems

Making the Connection: Greece Experiences a Bank Jog

4.3 What Factors Determine Exchange Rates?

Purchasing Power Parity

Why Purchasing Power Parity Doesn't Hold Exactly

The Interest Parity Condition

Solved Problem 4.3: Making a Financial Killing by Buying Brazilian Bonds?

Making the Connection: Brazilian Firms Grapple with an Unstable Exchange Rate

4.4 The Loanable Funds Model and the International Capital Market

Saving and Supply in the Loanable Funds Market

Investment and the Demand for Loanable Funds

Explaining Movements in Saving, Investment, and the Real Interest Rate

The International Capital Market and the Interest Rate

Table of Contents

Small Open Economy

Large Open Economy

Answering the Key Question

Key Terms and Problems

Key Terms and Concepts, Review Questions

Problems and Applications, Data Exercise

Chapter 5 The Standard of Living over Time and Across Countries

Who Is Number One?

Key Issue and Question

5.1 The Aggregate Production Function

The Cobb-Douglas Production Function

The Demand for Labor and the Demand for Capital

Changes in Capital, Labor, and Total Factor Productivity

Making the Connection: Foreign Direct Investment Increases Real GDP in China

5.2 A Model of Real GDP in the Long Run

The Markets for Capital and Labor

Combining the Factor Markets with the Aggregate Production Function

The Division of Total Income

Solved Problem 5.2: Calculating the Marginal Product of Labor and the Marginal Product of Capital

What Determines Levels of Real GDP Across Countries?

5.3 Why Real GDP per Worker Varies Among Countries

The per Worker Production Function

What Determines Labor Productivity?

Macro Data: How Well do International Capital Markets Allocate Capital?

What Determines Real GDP per Capita?

5.4 Total Factor Productivity and Labor Productivity

What Explains Total Factor Productivity?

Making the Connection: Comparing Research and Development Spending and Labor Productivity in China and the United States

Making the Connection: How Important Were the Chinese Economic Reforms of 1978?

Answering the Key Question

Key Terms and Problems

Key Terms and Concepts, Review Questions

Problems and Applications, Data Exercise

Chapter 6 Long-Run Economic Growth

The Surprising Economic Rise of India

Key Issue and Question

6.1 The Solow Growth Model

Table of Contents

Capital Accumulation

The Steady State

Transition to the Steady State

Saving Rates and Growth Rates

Macro Data: Do High Rates of Saving and Investment Lead to High Levels of Income?

6.2 Labor Force Growth and the Solow Growth Model

Labor Force Growth and the Steady State

The Effect of an Increase in the Labor Force Growth Rate

Solved Problem 6.2: The Effect of a Decrease in the Labor Force Growth Rate on Real GDP per Worker

6.3 Technological Change and the Solow Growth Model

Technological Change

Technological Change and the Steady State

Steady-State Growth Rates

6.4 Balanced Growth, Convergence, and Long-Run Equilibrium

Convergence to the Balanced Growth Path

Making the Connection: Will Chinas Standard of Living Ever Exceed that of the United States?

Do All Countries Converge to the Same Steady State?

6.5 Endogenous Growth Theory

AK Growth Models: Reconsidering Diminishing Returns

Two-Sector Growth Model: The Production of Knowledge

Policies to Promote Economic Growth

Making the Connection: What Explains Recent Economic Growth in India?

Making the Connection: Should the Federal Government Invest in Green Energy?

Answering the Key Question

Key Terms and Problems

Key Terms and Concepts, Review Questions

Problems and Applications, Data Exercise

Appendix: Growth Accounting

The Growth Accounting Equation for Real GDP

Growth Accounting for the United States

Total Factor Productivity as the Ultimate Source of Growth

Chapter 7 Money and Inflation

What Can You Buy With \$100 Trillion?

Key Issue and Question

7.1 What Is Money, and Why Do We Need It?

The Functions of Money

Commodity Money Versus Fiat Money

Making the Connection: When Money Is No Longer Money: Hyperinflation in Zimbabwe

Table of Contents

How Is Money Measured?

Which Measure of the Money Supply Should We Use?

7.2 The Federal Reserve and the Money Supply

How the Fed Changes the Monetary Base

The Process of Money Creation

7.3 The Quantity Theory of Money and Inflation

The Quantity Theory of Money

The Quantity Theory Explanation of Inflation

Making the Connection Is the Inflation Rate Around the World Going to Increase in the Near Future?

Solved Problem 7.3: The Effect of a Decrease in the Growth Rate of the Money Supply

Can the Quantity Theory Accurately Predict the Inflation Rate?

7.4 The Relationships Among the Growth Rate of Money, Inflation, and the Nominal Interest Rate

Real Interest Rates and Expected Real Interest Rates

The Fisher Effect

Money Growth and the Nominal Interest Rate

7.5 The Costs of Inflation

Costs of Expected Inflation

How Large Are the Costs of Expected Inflation?

Costs of Unexpected Inflation

Macro Data: What Is the Expected Inflation Rate?

Making the Connection: Did the Fed's Actions During the Financial Crisis of 2007-2009 Increase the Expected Inflation Rate?

Inflation Uncertainty

Benefits of Inflation

7.6 Hyperinflation and Its Causes

Causes of Hyperinflation

German Hyperinflation After World War I

Answering the Key Question

Key Terms and Problems

Key Terms and Concepts, Review Questions

Problems and Applications, Data Exercise

Appendix: The Money Multiplier

Open Market Operations

The Simple Deposit Multiplier

A More Realistic Money Multiplier

Chapter 8 The Labor Market

If Firms Have Trouble Finding Workers, Why Is the Unemployment Rate so High?

Key Issue and Question

Table of Contents

8.1 The Labor Market

Nominal and Real Wages

The Demand for Labor Services

Shifting the Demand Curve

The Supply of Labor Services

Factors That Shift the Labor Supply Curve

Equilibrium in the Labor Market

The Effect of Technological Change

Solved Problem 8.1: Why Don't People Work as Much as They Did Decades Ago?

8.2 Categories of Unemployment

Frictional Unemployment and Job Search

Structural Unemployment

Macro Data: Is the Decline of Industries That Produce Goods a Recent Phenomenon?

Cyclical Unemployment

Making the Connection: Did the Structural Unemployment Rate Rise During the Recession of 2007-2009?

Full Employment

Unemployment Around the World

Duration of Unemployment Around the World

8.3 The Natural Rate of Unemployment

A Simple Model of the Natural Rate of Unemployment

Solved Problem 8.3: How Many Jobs Does the U.S. Economy Create Every Month?

What Determines the Natural Rate of Unemployment?

Making the Connection: Are Strict Labor Laws to Blame for Unemployment in France?

8.4 Why Does Unemployment Exist?

Equilibrium Real Wages and Unemployment

Efficiency Wages

Labor Unions Around the World

Minimum Wage Laws

Answering the Key Question

Key Terms and Problems

Key Terms and Concepts, Review Questions

Problems and Applications, Data Exercise

Chapter 9 Business Cycles

Is the Housing Cycle the Business Cycle?

Key Issue and Question

9.1 The Short Run and the Long Run in Macroeconomics

The Keynesian and Classical Approaches

Macroeconomic Shocks and Price Flexibility

Why Are Prices Sticky in the Short Run?

Table of Contents

Making the Connection: The Curious Case of the 5-Cent Bottle of Coke

9.2 What Happens During a Business Cycle?

The Changing Severity of the U.S. Business Cycle

How Do We Know the Economy Is in an Expansion or a Recession?

Measuring Business Cycles

Solved Problem 9.2: Dating U.S. Recessions

Costs of the Business Cycle

Making the Connection: Did the 2007-2009 Recession Break Okun's Law?

Movements of Economic Variables During the Business Cycle

The Global Business Cycle

9.3 Shocks and Business Cycles

Multiplier Effects

An Example of a Shock with Multiplier Effects: The Bursting of the Housing Bubble

9.4 A Simple Model of the Business Cycle: Aggregate Demand and Aggregate Supply

Aggregate Demand and Aggregate Supply: An Introduction

Aggregate Supply Shocks and the Business Cycle

Aggregate Demand Shocks and the Business Cycle

Should Policy Try to Offset Shocks?

Making the Connection: How Important Is Housing in the Business Cycle?

Answering the Key Question

Key Terms and Problems

Key Terms and Concepts, Review Questions

Problems and Applications, Data Exercise

Appendix: The Formula for the Expenditure Multiplier

Chapter 10 Explaining Aggregate Demand: The ISMP Model

Fear of Falling (into a Recession)

Key Issue and Question

10.1 The IS Curve: The Relationship Between Real Interest Rates and Aggregate Expenditure

Equilibrium in the Goods Market

The Multiplier Effect

The Government Purchases and Tax Multipliers

Solved Problem 10.1: Calculating Equilibrium Real GDP

Constructing the IS Curve

Shifts of the IS Curve

The IS Curve and the Output Gap

10.2 The Monetary Policy Curve: The Relationship Between the Central Bank's Target Interest Rate and Output

The Link Between the Short-Term Nominal Interest Rate and the Long-Term Real

Table of Contents

Interest Rate

Macro Data Box: Real Interest Rates and the Global Savings Glut

Interest Rate Movements During the 2007-2009 Recession

Deriving the MP Curve Using the Money Market Model

Shifts of the MP Curve

10.3 Equilibrium in the ISMP Model

Demand Shocks and Fluctuations in Output

Making the Connection: Will the European Financial Crisis Cause a Recession in the United States?

Monetary Policy and Fluctuations in Real GDP

Solved Problem 10.3: Using the ISMP Model to Analyze the 2001 Tax Cut

ISMP and Aggregate Demand

Answering the Key Question

Key Terms and Problems

Key Terms and Concepts, Review Questions

Problems and Applications, Data Exercise

Appendix: ISLM: An Alternative Short-Run Macroeconomic Model

Asset Market Equilibrium

Deriving the LM Curve

Shifting the LM Curve

Equilibrium in the ISLM Model

Solved Problem 10A.1: Monetary Policy During the Great Depression

An Alternative Derivation of the MP Curve

Key Terms and Problems

Key Terms and Concepts, Review Questions

Problems and Applications, Data Exercise

Chapter 11 The ISMP Model: Adding Inflation and the Open Economy

Where's the Inflation?

Key Issue and Question

11.1 The ISMP Model and the Phillips Curve

Okuns Law, the Output Gap, and the Phillips Curve

Movement Along an Existing Phillips Curve

Shifts of the Phillips Curve

How Well Does the Phillips Curve Fit the Inflation Data?

Making the Connection: Lots of Money but Not Much Inflation Following the Recession of 2007-2009

Using Monetary Policy to Fight a Recession

Solved Problem 11.1: Fed Policy to Keep Inflation from Increasing

11.2 The Performance of the U.S. Economy During 2007-2009

Using the ISMP Model to Analyze the Financial Crisis and the Housing Crash

Table of Contents

The ISMP Model and the Oil Shock of 20072008

11.3 The ISMP Model in an Open Economy"

The IS Curve with a Floating Exchange Rate

Monetary Policy with a Floating Exchange Rate

Equilibrium in an Open Economy with a Floating Exchange Rate

The ISMP Model with a Fixed Exchange Rate

The IS Curve with a Fixed Exchange Rate

The MP Curve with a Fixed Exchange Rate

Macro Data: Did the Gold Standard Make the Great Depression Worse?

Equilibrium in an Open Economy with a Fixed Exchange Rate

Making the Connection: Can the Euro Survive?

Answering the Key Question

Key Terms and Problems

Key Terms and Concepts, Review Questions

Problems and Applications, Data Exercise

Chapter 12 Monetary Policy in the Short Run

Why Didnt the Fed Avoid the Recession of 20072009?

Key Issue and Question

12.1 The Federal Reserve System

Creation of the Federal Reserve System

The Structure of the Federal Reserve System

12.2 The Goals of Monetary Policy

Price Stability

High Employment

Financial Market Stability

Interest Rate Stability

The Feds Dual Mandate

12.3 Monetary Policy Tools

Open Market Operations

Discount Loans and the Lender of Last Resort

Macro Data: Does the Federal Reserve Hit Its Federal Funds Rate Target?

Reserve Requirements

New Monetary Policy Tools in Response to the 20072009 Financial Crisis

Making the Connection: On the Board of Governors, Four Can Be a Crowd

12.4 Monetary Policy and the ISMP Model

Monetary Policy and Aggregate Expenditure

Using Monetary Policy to Fight a Recession

Using Monetary Policy to Fight Inflation

Using Monetary Policy to Deal with a Supply Shock

Solved Problem 12.4: Did the Federal Reserve Make the Great Depression Worse?

Table of Contents

The Liquidity Trap, the Zero Lower Bound, and Alternative Channels of Monetary Policy

12.5 The Limitations of Monetary Policy

Policy Lags

Economic Forecasts

Model Uncertainty

Consequences of Policy Limitations

Solved Problem 12.5: Did the Fed Help Cause the 2001 Recession?

Moral Hazard

Making the Connection: Too Big to FailThe Legacy of Continental Illinois

12.6 Central Bank Independence

The Independence of the U.S. Federal Reserve

12.7 Monetary Policy in an Open Economy

Monetary Policy with Floating Exchange Rates

Monetary Policy with a Fixed Exchange Rate

The Policy Trilemma for Economic Policy

Answering the Key Question

Key Terms and Problems

Key Terms and Concepts, Review Questions

Problems and Applications, Data Exercise

Chapter 13 Fiscal Policy in the Short Run

Driving Toward a Fiscal Cliff

Key Issue and Question

13.1 The Goals and Tools of Fiscal Policy

Who Conducts Fiscal Policy?

Traditional Tools of Fiscal Policy

Making the Connection: Why Was the Severity of the 20072009 Recession So Difficult to Predict?

13.2 Budget Deficits, Discretionary Fiscal Policy, andAutomatic Stabilizers

Discretionary Fiscal Policy and Automatic Stabilizers

The Budget Deficit and the Budget Surplus

Making the Connection: How Did the Federal Government Run a Budget Surplus in the Late 1990s and Early 2000s?

Macro Data: Did Fiscal Policy Fail During the Great Depression?

The Deficit and the Debt

Is the Federal Debt a Problem?

13.3 The Short-Run Effects of Fiscal Policy

Fiscal Policy and the IS Curve

Using Discretionary Fiscal Policy to Fight a Recession

Automatic Stabilizers

Solved Problem 13.3A: Should the Federal Government Eliminate the Budget

Table of Contents

Deficit?

Making the Connection: State and Local Government Spending During the 2007-2009 Recession

Personal Income Tax Rates and the Multiplier

Solved Problem 13.3B: Calculating Equilibrium Real GDP and the Expenditure Multiplier with Income Taxes

The Effects of Changes in Tax Rates on Potential GDP

13.4 The Limitations of Fiscal Policy

Policy Lags

Economic Forecasts

The Uncertainty of Economic Models

Crowding Out and Forward-Looking Households

When Will Fiscal Multipliers Be Large?

Moral Hazard

Consequences of Policy Limitations

Evaluating the American Recovery and Reinvestment Act

13.5 Fiscal Policy in an Open Economy

Fiscal Policy with Floating Exchange Rates

Fiscal Policy with a Fixed Exchange Rate

Answering the Key Question

Key Terms and Problems

Key Terms and Concepts, Review Questions

Problems and Applications, Data Exercise

Chapter 14 Aggregate Demand, Aggregate Supply, and Monetary Policy

Did the Fed Create and Then Kill the Great Moderation?

Key Issue and Question

14.1 Aggregate Demand Revisited

The Aggregate Demand Curve

Shifts of the Aggregate Demand Curve

When Are Shifts to the Aggregate Demand Curve Permanent?

14.2 Aggregate Supply and the Phillips Curve

Shifts in the Aggregate Supply Curve

14.3 The Aggregate Demand and Aggregate Supply Model

Equilibrium in the ADAS Model

The Effects of a Supply Shock

Permanent Demand Shocks: Changes in the Central Bank Reaction Function

Macro Data: Are Oil Supply Shocks Really That Important?

Making the Connection: The End of Stagflation and the Volcker Recession

Temporary Demand Shocks: Changes in Aggregate Expenditure

Solved Problem 14.3: Applying the ADAS Model to an Increase in Housing Construction

Table of Contents

14.4 Rational Expectations and Policy Ineffectiveness

Rational Expectations and Anticipated Policy Changes

Rational Expectations and Unanticipated Policy Changes

Rational Expectations and Demand Shocks

Are Anticipated and Credible Policy Changes Actually Ineffective?

14.5 Monetary Policy: Rules Versus Discretion

The Taylor Rule

The Taylor Rule and the Real Interest Rate

The Case for Discretion

The Case for Rules

Making the Connection: Central Banks Around the World Try Inflation Targeting

Answering the Key Question

Key Terms and Problems

Key Terms and Concepts, Review Questions,

Problems and Applications, Data Exercise

Chapter 15 Fiscal Policy and the Government Budget in the Long Run

Drowning in a Sea of Debt?

Key Issue and Question

15.1 Debt and Deficits in Historical Perspective

The Government Budget Constraint

The Relationship Between the Deficit and the National Debt

Gross Federal Debt Versus Debt Held by the Public

The Debt-to-GDP Ratio

Composition of Federal Government Revenue and Expenditure

Federal Government Expenditure

15.2 The Sustainability of Fiscal Policy

Expressing the Deficit as a Percentage of GDP

Making the Connection: The European Debt Crisis

When Is Fiscal Policy Sustainable?

Solved Problem 15.2: Can Japan Grow Its Way Out of Debt?

15.3 The Effects of Budget Deficits in the Long Run

The Budget Deficit and Crowding Out

The Conventional View: Crowding Out Private Investment

Ricardian Equivalence

Macro Data: Do Government Deficits Increase Real Interest Rates?

15.4 The Fiscal Challenges Facing the United States

Projections of Federal Government Revenue and Expenditure

Making the Connection: Many Proposals but Not Much Progress on the Deficit

Will the United States Pay Off Its Debt?

Policy Options

Table of Contents

Answering the Key Question

Key Terms and Problems

Problems and Applications, Data Exercise

Key Terms and Concepts, Review Questions

Appendix A: Showing the Conditions for a Sustainable Fiscal Policy

Appendix B: Showing the Relationship between Budget Deficits and Private Expenditure

Chapter 16 Consumption and Investment

Are All Tax Cuts Created Equal?

Key Issue and Question

16.1 The Macroeconomic Implications of Microeconomic Decision Making: Intertemporal Choice

Households and Firms are Forward Thinking

An Important Difference Between Consumption and Investment

16.2 Factors That Determine Consumption

Consumption and GDP

The Intertemporal Budget Constraint and Consumption Smoothing

Two Theories of Consumption Smoothing

Permanent Versus Transitory Changes in Income

Consumption and the Real Interest Rate

Housing Wealth and Consumption

How Policy Affects Consumption

Solved Problem 16.2: Effects of a Temporary Tax Cut on Your Consumption

Credit Rationing of Households

Making the Connection: The Temporary Cut in Payroll Taxes

Precautionary Saving

Tax Incentives and Saving

16.3 Factors That Determine Private Investment

The Investment Decisions of Firms

Corporate Taxes and the Desired Capital Stock

Macro Data: How Important Are Corporate Taxes for Investment?

Making the Connection: From Transitory Tax Cuts to Tax Reform

From the Desired Capital Stock to Investment

Solved Problem 16.3: Depreciation, Taxes, and Investment Spending

Tobins q : Another Framework for Explaining Investment

Credit Rationing and the Financial Accelerator

Uncertainty and Irreversible Investment

Answering the Key Question

Key Terms and Problems

Key Terms and Concepts, Review Questions

Table of Contents

Problems and Applications, Data Exercise
