Fluency With Information Technology
Skills, Concepts, & Capabilities
SIXTH EDITION
Lawrence Snyder
Fluency With Information Technology: Global Edition

Table of Contents

Cover
Preface
Contents
Location of VideoNotes in the Text
Online Labs
Part 1: Becoming Skilled at Computing
   Part 1: Introduction
      Chapter 1: Defining Information Technology Terms of Endearment
         Computations Greatest Hits
            Digitizing Information
            Stored-Program Computers
            The Switch to Transistors
            Integrated Circuits
            Personal Computers
            The Internet
            HTTP and the World Wide Web
            Layered Software Development
            The Great Part of the Greatest Hits
         Terms of Endearment
            Tech Support
            Anchoring Knowledge
         Computers, Software, Algorithms
            Find the Computer
            Software
            Algorithms
         The Words for Ideas
            Abstract
            Generalize
            Operationally Attuned
            Mnemonic
         Summary
         Try It Solutions
         Review Questions
            Multiple Choice
            Short Answer
            Exercises
      Chapter 2: Exploring the Human-Computer Interface Face It, Its a Computer
         A Few Useful Concepts
            Feedback
            Consistent Interface
Table of Contents

New Instance
Perfect Reproduction
   An Exact Duplicate
Copying
What We See and What We Think
   Metaphors
   The Desktop
   The Touch Metaphor
   Relationship Between Metaphors
   Summary of Metaphors

Summary
Try It Solutions
Review Questions
   Multiple Choice
   Short Answer
   Exercises

Chapter 3: The Basics of Networking Making the Connection
Comparing Communication Types
   General Communication
   The Internets Communication Properties
   The Client/Server Structure
   Appearing to Stay Connected

The Medium of the Message
   The Name Game of Computer Addresses
   Following Protocol
   Far and Near: WAN and LAN
   Connecting Your Computer to the Internet
   Domains and the DNS
   DNS Summary

The World Wide Web
   Requesting a Web Page
   The Internet and the Web
   Describing a Web Page

File Structure
   Directory Hierarchy
   Organizing the Folder

Summary
Try It Solutions
Review Questions
   Multiple Choice
   Short Answer
   Exercises

Chapter 4: A Hypertext Markup Language Primer Marking Up with HTML
Marking Up with HTML
   Formatting with Tags
Table of Contents

Tags for Bold and Italic
Required Tags

Lab Practice I
Firefox
Text Editor
Hello, World!
Save This Page
Practicing in the Lab

Structuring Documents
Headings in HTML
HTML Format Versus Display Format
White Space
Attributes
Brackets in HTML: The Escape Symbol
Accent Marks in HTML

Lab Practice II
Compose and Check
Markup Validation Service

Get Into Style with CSS
A Place for Style
Styling Background and Paragraph
CSS Styling
Designing the Paradoxes Page

Marking Links and Images
Two Sides of a Hyperlink
Structure of the Image Tag

Referring to Files
Referring to Pages and Images

Span, Lists, Tables, and Boxes
Span
Lists Tags
Handling Tables
The Box Model

Cascading Style Sheets
Style in Many Places
Globally Speaking
The Cascade

Styling with Class
A class Attribute
An Alternate Class

Hovering Above Links
Navigation Bars

HTML Wrap-Up
Gradient Background
Easy Enough for a Computer

Summary
Table of Contents

Try It Solutions
Review Questions
  Multiple Choice
  Short Answer
  Exercises

Chapter 5: Locating Information on the WWW The Search for Truth
  Web Search Fundamentals
    How a Search Engine Works
    Multiword Searches
    Descriptive Terms
    Page Rank
  Advanced Searches
    The Logical Operator AND
    Complex Queries
    Combining Logical Operators
    Restricting Global Search
    Focused Searches
  Web Searching
    Selecting Search Terms
    The Anatomy of a Hit
    Using the Hit List
    Once You Find a Likely Page
    Searching Strategy Summary
    Bing Search
  Authoritative Information
    Don't Believe Everything You Read
    Wikipedia
    What is Authoritative?
    Authoritative Sources
  Truth or Fiction?
    Site Analysis
    Tough Work
  Summary

Chapter 6: An Introduction to Debugging To Err Is Human
  Precision: The High Standards of Computing
    Be Accurate
    Be Observant
  Debugging: What's the Problem?
    Debugging in Everyday Life
    Debugging in Information Technology
Table of Contents

Who's Problem is It?
Using the Computer to Debug
A Dialog About Debugging
Debugging Recap
Fixing HTML Bugs: A Case Study
  Look at the Page Closely
  Focusing the Search
  Nearly Perfect
  Debugging the JJK Page: A Postmortem
No Printer Output: A Classic Scenario
  Applying the Debugging Strategy
  Pressing On
  The Print Queue
  Calling Tech Support?
Ensuring the Reliability of Software
  Safety-Critical Applications
  Fail-Safe and Fail-Soft Software
Community Debugging
Summary
Try It Solutions
Review Questions
  Multiple Choice
  Short Answer
  Exercises
Interview with Vinton G. Cerf

Part 2: Algorithms and Digitizing Information
  Part 2: Introduction
  Chapter 7: Representing Information Digitally Bits and the Why of Bytes
  Digitizing Discrete Information
    Limitation of Digits
    Alternative Representations
    Symbols, Briefly
    Ordering Symbols
  Information Representation
    Beyond the Physical World
    Memory
    Bits in Computer Memory
  Binary and Hex
    Binary
    Hex
    Changing Hex Digits to Bits and Back Again
  Digitizing Numbers in Binary
    Binary Numbers Compared with Decimal Numbers
  Digitizing Text
Table of Contents

OCR Technology
Multimedia Challenges
  The Challenge of Latency
  The Challenge of Bandwidth
Bits Are It
  Bits: The Universal Medium
  Bits: Bias-Free
  Bits Are Not Necessarily Binary Numbers
Summary
Try It Solutions
Review Questions
  Multiple Choice
  Short Answer
  Exercises

Chapter 9: Principles of Computer Operations Following Instructions

There's an App for That
  The Usual Suspects
Software Isn't So Hard
  Deciding On What to Do
  Software Layers
Instruction Execution Engine
  The Fetch/Execute Cycle
  Anatomy of a Computer
  Input Unit and Output Unit
  Machine Instructions
The Program Counter: The PC's PC
  Address of the Next Instruction
  Branch and Jump Instructions
Instruction Execution
  Stepping Through ADD
  The Clocks Ticking
  Many, Many Simple Operations
Translation
  Assembly Language
  Compiling
Integrated Circuits
  Miniaturization
  Integration
  Photolithography
How Semiconductor Technology Works
  Field Effect
  Semiconducting Elements
  Field Effect Transistors
  Implementing ALU Operations
Combining the Ideas
Table of Contents

Summary
Try It Solutions
Review Questions
  Multiple Choice
  Short Answer
  Exercises

Chapter 10: Algorithmic Thinking What's the Plan?

Algorithms
  Writing One Letter at a Time
  Homemade Algorithms
  Many Questions; Fewer Questions
  Writing Algorithms
  Algorithms Versus Programs
  Experience with Algorithms
  Textbook Examples of Algorithms
  Algorithms Versus Heuristic Processes
  Inventing Algorithms

Algorithms A Basic Concept
  A Definition

A Closer Look
  Query Evaluation
  Intersecting Lists
  A Familiar Solution
  How Not to Match
  Different Solutions

Doing the Right Thing
  A Strategy
  Explaining Why IAL Works
  Summary on Correctness

Summary
Try It Solutions
Review Questions
  Multiple Choice
  Short Answer

Interview with Ray Kurzweil

Part 3: Data and Information

Chapter 11: Social Implications of IT Computers in Polite Society

The Power of the Crowd
  Crowdsourcing
  Be a Martian
  Foldit
  Civic Participation Freerice
  Kickstarter

Out on Good Behavior
Table of Contents

Netiquette
Specific Guidelines for Email
Please, Don’t Be Offended

Expect the Unexpected
The Onion
Suspicious Activity

Creating Good Passwords
The Role of Passwords
How Passwords Work
Poor Passwords
Creating Quality Passwords
Easy to Remember
Hard to Guess
Managing Passwords

Spam
Controlling Spam

Scams
Nigerian Widow Scam
Phishing
The End of the Phishing Story

Protecting Intellectual Property
Licensing of Software
Open Source Software
Copyright on the Web
Violating the Copyright Law

Creative Commons
Allow Copying and Distribution
What to Keep, What to Give

Chapter 12: Privacy and Digital Security Shhh, It’s a Secret

Privacy and Technology
Modern Devices and Privacy
Information Sources and Uses
Controlling the Use of Information

A Privacy Definition

Enjoying the Benefits of Privacy
Voluntary Disclosure

Fair Information Practices
OECD Fair Information Practices

# Table of Contents

Writing a Formula  
Repeating a Formula  
Transforming Formulas: Relative Versus Absolute  
Cell Formats  
Functions  
Finding the Maximum  
Displaying Hidden Columns  
Charts  

**Daily Spreadsheets**  
Time Zone Cheat Sheet  
Solving a Problem of Personal Interest  
Getting Started, Then Filling In  
Finish Up  
Pizza Discount Table  
A Plan  
The Requirements  
Absolute References  
Relative References  
Paying Off a Loan  

**Importing Data**  
Tab-Delimited Data  
Arranging Columns  

**Summary**  

**Try It Solutions**  

**Review Questions**  
True/False  
Multiple Choice  
Short Answer  
Exercises  

**Chapter 14: Advanced Spreadsheets for Planning What If Thinking Helps**  

**Designing a Spreadsheet**  
The Trip  
Design Guidelines  
Initial Spreadsheet: Applying the Rules  

**Conditional Formatting**  
Cell Value is Specifications  
Formula is Specifications  
Distinguish Between the United States and Canada  

**Conditional Formulas**  
Figuring the Amount Paid  
Cost in One Currency  

**Naming: Symbolic Reference**  
Defining Names  
Applying Names  
Make Assumptions Explicit  

What If Analysis

## Chapter 15: Introduction to Database Concepts

### A Table with a View  
Differences Between Tables and Databases  
Comparing Tables  
The Databases Advantage  

XML: A Language for Metadata Tags  
An Example from Tahiti  
Expanding the Use of XML  
Attributes in XML  
Effective Design with XML Tags  
The XML Tree  

### Tables and Entities  
Entities  
Properties of Entities  
Every One Is Different  

### The Science of Tables  
Relational Database Tables  
Computing with Tables  
Ask Any Question  
Summarizing the Science  

### SQL: The Language of Databases  
Structure of a Database  
Physical and Logical Databases  

Summary  
Try It Solutions  
Review Questions  
Multiple Choice  
Short Answer

## Chapter 16: A Case Study in Database Organization

### The iDiary Database  
Thinking About a Personal Database  
Regular Versus Irregular Data  
Physical Versus Logical
Table of Contents

The iDiary
A Preliminary Exercise
Travels Database
Displaying the Travels with XSL
The iDiary Database
Getting Started
Creating a First Entry (August 11)
Thinking About the Nature of Things
Developing Tags and Templates
Using the iDiary Daily
Archiving Photos
Hiding Information
Entering Data into the Database
Summary
Try It Solutions
Review Questions
Multiple Choice
Short Answer
Exercises
Interview with Alan Kay

Part 4: Problem Solving
Part 4: Introduction

Chapter 17: Fundamental Concepts Expressed in JavaScript Get with the Program
Overview: Programming Concepts
Names, Values, and Variables
Names Have Changing Values
Names in a Program Are Called Variables
Identifiers and Their Rules
A Variable Declaration Statement
The Statement Terminator
Rules for Declaring Variables
Three Basic Data Types of JavaScript
Rules for Writing Numbers
Strings
Boolean Values
The Assignment Statement
Assignment Symbol
Interpreting an Assignment Statement
Three Key Points About Assignment
Lab Practice
Scratchpad Hello, World
An Expression and Its Syntax
Arithmetic Operators
Relational Operators
Logical Operators
Table of Contents

A Conditional Statement
  if Statements and Their Flow of Control
  Compound Statements
  if/else Statements
  Nested if/else Statements

The Espresso Program
  The Logic of a Double Tall Latte

Summary

Chapter 18: A JavaScript Program The Bean Counter

Preliminaries
  Background for the UI
    Review of HTML Basics
    Interacting with a UI
    Three Input Elements

Creating the Graphical User Interface
  1. Create a Button Table
  2. Delete Two Buttons
  3. Insert Text Box
  4. Label the Buttons
  5. Primp the Interface

Event-Based Programming
  The onclick Event Handler
  Click Event
  Shots Button
  Size and Drink Buttons
  Clear Button and Initialization
  Referencing Data Across Inputs

Critiquing the Bean Counter
  Numbers Versus Money
  Organization
  Feedback
  Application

Bean Counter Recap
  Program and Test
  Assess the Program Design

Summary

Try It Solutions

Review Questions
  Multiple Choice
  Short Answer
Table of Contents

Exercises

Chapter 19: Programming Functions Thinking Big

Anatomy of a Function
  Converting Some Temperatures
  Making the Call
  Definition Versus Call

Forms and Functions
  Writing Functions, Using Functions
    Flipping Electronic Coins
    The Body Mass Index Computation

Customizing Pages
  Creating Page Content
  Customizing the Coin Flip

Making a Web-Based Phone App
  Design for Mobility
  Referencing Functions
  The Counter Assistants Structure
  Better Applications
  Recap: Two Reasons to Write Functions

Social Functions
  Using Other Peoples Code
  Making a Comment

Summary

Try It Solutions

Review Questions
  Multiple Choice
  Short Answer
  Exercises

Chapter 20: Iteration Principles Once Is Not Enough

Iteration: Play It Again, Sam
  The for Loop Basic Syntax
  How a for Loop Works

JavaScript Rules for for Loops
  The World-Famous Iteration
  Why So Famous?
  Avoiding Infinite Loops

Experiments with Flipping Coins
  One Trial of 100 Flips
  Multiple Trials
  A Diagram of Results
  Nested Loops

Indexing
  Index Syntax
  Index Origin

Arrays
## Table of Contents

Rules for Arrays  
*Array Reference Syntax*

### Its Magic
- Setting Up the Array  
- Structuring the Page

### The Busy Animation
- Using a Timer to Initiate Animation  
- Prefetching Images  
- Redrawing an Image

### Not So Busy Animation
- Three Key Ideas

### Summary

### Try It Solutions

### Review Questions
- Multiple Choice  
- Short Answer  
- Exercises

### Chapter 21: A Case Study in Algorithmic Problem Solving The Smooth Motion Application

#### The Smooth Motion Application
- How the Smooth Motion Application Should Work

#### Planning Smooth Motion
- Apply the Decomposition Principle  
- List the Tasks  
- Decide on a Problem-Solving Strategy

#### Build the Basic Web Page UI
- The Structural Page  
- The Structural Page Heading

#### Animate the Grid
- First Analysis  
- Second Analysis  
- Subtask: Define and Organize the Frames  
- Subtask: Define and Place Initial Images  
- Subtask: Prefetch the Frame Images  
- Subtask: Set Timer and Build Timer Event Handler

#### The Best Laid Plans . . .

#### Build Controls

#### Sense the Keys
- Subtask: Define and Organize the Frames  
- Subtask: Place the Initial Images  
- Subtask: Prefetch the Frames  
- Subtask: Build the Event Handlers  
- Combine the Subtasks

#### Staircase Detection
- Subtask: Recognizing the Staircase
Table of Contents

- Subtask: Recognizing Continuity
- Assemble Overall Design
- Primp the Design
  - Assessment and Retrospective
- Summary
- Try It Solutions
- Review Questions
  - Multiple Choice
  - Short Answer
  - Exercises

Chapter 22: Limits to Computation Computers Can Do Almost{ Everything, Nothing}
- Can Computers Think?
  - The Turing Test
  - Passing the Test
- Acting Intelligently?
  - Playing Chess
  - A Game Tree
  - Using the Game Tree Tactically
  - Using Database Knowledge
  - Using Parallel Computation
  - The Deep Blue Matches
  - Interpreting the Outcome of the Matches
- Watson
  - Computer Versus Humans
  - Technical Challenge
  - Summary on Watson
- Acting Creatively?
  - Creativity as a Spectrum
  - What Part of Creativity is Algorithmic?
- The Universality Principle
  - Universal Information Processor
  - Practical Consequences of the Universality Principle
- More Work, Slower Speed
  - Comparing IAL with NAL
- Are Best Algorithms All Fast?
  - NP-Complete Problems
  - Unsolvable Problems
- Summary
- Try It Solutions
- Review Questions
  - Multiple Choice
  - Short Answer
  - Exercises

Chapter 23: A Fluency Summary Click to Close
# Table of Contents

Two Big Computing Ideas
  - Information Structuring
  - Strategies for Nonalgorithmic Tasks

Fluency: Less Is More

Lifelong IT Learning
  - Pursuing New Uses
  - Asking for Help
  - Noticing New Technology

Shifting for Yourself

Try It Solutions

Review Questions
  - Multiple Choice
  - Short Answer
  - Exercises

Interview with David Ferrucci

## Appendix

### Appendix A: HTML5 Reference
  - Required HTML Tags
  - HTML Tags
  - Worked Example: D.C. Trip Page

### Appendix B: RSA Public Key Cryptosystem
  - Choosing a Key
  - Encrypting a Message
  - The Decryption Method
  - Summarizing the RSA System

### Appendix C: iDiary: Tags and Templates
  - XML Database File iDiary.xml
  - XSL file iDiarySS.xsl

### Appendix D: JavaScript Programming Rules
  - Program Structure
  - Data Types
  - Variables and Declarations
  - Expressions
  - Arrays and Indexes
  - Statements
  - Functions
  - Guidelines

### Appendix E: The Bean Counter Program

### Appendix F: myApps Page

### Appendix G: Smooth Motion Program
