Brief Contents

Contents

Preface

About the Authors

Part I Introduction to Analytics and AI

Chapter 1 Overview of Business Intelligence, Analytics, Data Science, and Artificial Intelligence: Systems for Decision Support

1.1 Opening Vignette: How Intelligent Systems Work for KONE Elevators and Escalators Company

1.2 Changing Business Environments and Evolving Needs for Decision Support and Analytics

Decision-Making Process

The Influence of the External and Internal Environments on the Process

Data and Its Analysis in Decision Making

Technologies for Data Analysis and Decision Support

1.3 Decision-Making Processes and Computerized Decision Support Framework

Simon's Process: Intelligence, Design, and Choice

The Intelligence Phase: Problem (or Opportunity) Identification

Application Case 1.1 Making Elevators Go Faster

The Design Phase

The Choice Phase

The Implementation Phase

The Classical Decision Support System Framework

A DSS Application

Components of a Decision Support System

The Data Management Subsystem

The Model Management Subsystem

Application Case 1.2 SNAP DSS Helps OneNet Make Telecommunications Rate Decisions

The User Interface Subsystem

The Knowledge-Based Management Subsystem

Table of Contents

1.4 Evolution of Computerized Decision Support to Business

Intelligence/Analytics/Data Science

A Framework for Business

Intelligence

The Architecture of BI

The Origins and Drivers of BI

Data Warehouse as a Foundation for Business

Intelligence

Transaction Processing versus Analytic

Processing

A Multimedia Exercise in Business

Intelligence

1.5 Analytics Overview

Descriptive Analytics

Application Case 1.3 An Post and the Use of Data Visualization in Daily Postal Operations

Application Case 1.4 Siemens Reduces Cost with the Use of Data Visualization

Predictive Analytics

Application Case 1.5 SagaDigits and the Use of Predictive Analytics

Prescriptive Analytics

Application Case 1.6 A Specialty Steel Bar Company Uses Analytics to Determine Available-to-Promise Dates

1.6 Analytics Examples in Selected

Domains

Sports Analytics An Exciting Frontier for Learning and Understanding

Applications of Analytics

Analytics Applications in Healthcare—Humana

Examples

Application Case 1.7 Image Analysis Helps Estimate Plant Cover

1.7 Artificial Intelligence Overview

What Is Artificial Intelligence

The Major Benefits of AI

The Landscape of AI

Application Case 1.8 AI Increases Passengers Comfort and Security in Airports and Borders

The Three Flavors of AI Decisions

Autonomous AI

Societal Impacts

Application Case 1.9 Robots Took the Job of Camel-Racing Jockeys for Societal Benefits

1.8 Convergence of Analytics and AI

Major Differences between Analytics and AI

Why Combine Intelligent Systems

How Convergence Can Help

Big Data Is Empowering AI

Technologies

The Convergence of AI and the IoT

Table of Contents

The Convergence with Blockchain and Other
Technologies

Application Case 1.10 Amazon Go Is Open for Business

IBM and Microsoft Support for Intelligent Systems
Convergence

1.9 Overview of the Analytics

Ecosystem

1.10 Plan of the Book

1.11 Resources, Links, and the Teradata University Network Connection

Resources and Links

Vendors, Products, and Demos

Periodicals

The Teradata University Network
Connection

The Book's Web Site

Chapter Highlights

Key Terms

Questions for Discussion

Exercises

References

Chapter 2 Artificial Intelligence: Concepts, Drivers, Major Technologies, and Business Applications

2.1 Opening Vignette: INRIX Solves Transportation Problems

2.2 Introduction to Artificial

Intelligence

Definitions

Major Characteristics of AI Machines

Major Elements of AI

AI Applications

Major Goals of AI

Drivers of AI

Benefits of AI

Some Limitations of AI Machines

Three Flavors of AI Decisions

Artificial Brain

2.3 Human and Computer Intelligence

What Is Intelligence

How Intelligent Is AI

Measuring AI

Application Case 2.1 How Smart Can a Vacuum Cleaner Be

2.4 Major AI Technologies and Some

Derivatives

Intelligent Agents

Machine Learning

Application Case 2.2 How Machine Learning Is Improving Work in Business

Machine and Computer Vision

Table of Contents

Robotic Systems

Natural Language Processing

Knowledge and Expert Systems and
Recommenders

Chatbots

Emerging AI Technologies

2.5 AI Support for Decision Making

Some Issues and Factors in Using AI in Decision
Making

AI Support of the Decision-Making
Process

Automated Decision Making

Application Case 2.3 How Companies Solve Real-World Problems Using Googles
Machine-Learning Tools

Conclusion

2.6 AI Applications in Accounting

AI in Accounting: An Overview

AI in Big Accounting Companies

Accounting Applications in Small
Firms

Application Case 2.4 How EY, Deloitte, and PwC Are Using AI
Job of Accountants

2.7 AI Applications in Financial Services

AI Activities in Financial Services

AI in Banking: An Overview

Illustrative AI Applications in
Banking

Insurance Services

Application Case 2.5 AI in Chinas Financial Sector

2.8 AI in Human Resource Management (HRM)

AI in HRM: An Overview

AI in Onboarding

Application Case 2.6 How Alexander Mann Solutions (AMS) Is Using AI to Support
the Recruiting Process

Introducing AI to HRM Operations

2.9 AI in Marketing, Advertising, and CRM

Overview of Major Applications

AI Marketing Assistants in Action

Customer Experiences and CRM

Application Case 2.7 Kraft Foods Uses AI for Marketing and CRM

Other Uses of AI in Marketing

2.10 AI Applications in Production-Operation Management (POM)

AI in Manufacturing

Implementation Model

Intelligent Factories

Table of Contents

Logistics and Transportation

Chapter Highlights

Key Terms

Questions for Discussion

Exercises

References

Chapter 3 Nature of Data, Statistical Modeling, and Visualization

3.1 Opening Vignette: SiriusXM Attracts and Engages a New Generation of Radio Consumers with Data-Driven Marketing

3.2 Nature of Data

3.3 Simple Taxonomy of Data

Application Case 3.1 Verizon Answers the Call for Innovation: The Nations Largest Network Provider Uses Advanced Analytics to Bring the Future to Its Customers

3.4 Art and Science of Data

Preprocessing

Application Case 3.2 Improving Student Retention with Data-Driven Analytics

3.5 Statistical Modeling for Business

Analytics

Descriptive Statistics for Descriptive Analytics

Measures of Centrality Tendency (Also Called Measures of Location or Centrality)

Arithmetic Mean

Median

Mode

Measures of Dispersion (Also Called Measures of Spread or Decentrality)

Range

Variance

Standard Deviation

Mean Absolute Deviation

Quartiles and Interquartile Range

Box-and-Whiskers Plot

Shape of a Distribution

Application Case 3.3 Town of Cary Uses Analytics to Analyze Data from Sensors, Assess Demand, and Detect Problems

3.6 Regression Modeling for Inferential Statistics

How Do We Develop the Linear Regression Model

How Do We Know If the Model Is Good Enough

What Are the Most Important Assumptions in Linear Regression

Logistic Regression

Time-Series Forecasting

Table of Contents

Application Case 3.4 Predicting NCAA Bowl Game Outcomes

3.7 Business Reporting

Application Case 3.5 Flood of Paper Ends at FEMA

3.8 Data Visualization

Brief History of Data Visualization

Application Case 3.6 Macfarlan Smith Improves Operational Performance Insight with Tableau Online

3.9 Different Types of Charts and Graphs

Basic Charts and Graphs

Specialized Charts and Graphs

Which Chart or Graph Should You Use

3.10 Emergence of Visual Analytics

Visual Analytics

High-Powered Visual Analytics

Environments

3.11 Information Dashboards

Application Case 3.7 Flink Labs and Dashboard Applications Development

Dashboard Design

Application Case 3.8 Visual Analytics Helps Energy Supplier Make Better Connections

What to Look for in a Dashboard

Best Practices in Dashboard Design

Benchmark Key Performance Indicators with Industry Standards

Wrap the Dashboard Metrics with Contextual Metadata

Validate the Dashboard Design by a Usability Specialist

Prioritize and Rank Alerts/Exceptions Streamed to the Dashboard

Enrich the Dashboard with Business-User Comments

Present Information in Three Different Levels

Pick the Right Visual Construct Using Dashboard Design Principles

Provide for Guided Analytics

Chapter Highlights

Key terms

Questions for Discussion

Exercises

References

PART II Predictive Analytics/Machine Learning

Chapter 4 Data Mining Process, Methods, and

Table of Contents

Algorithms

4.1 Opening Vignette: Miami-Dade Police Department Is Using Predictive Analytics to Foresee and Fight Crime

4.2 Data Mining Concepts

Application Case 4.1 Visa Is Enhancing the Customer Experience While Reducing Fraud with Predictive Analytics and Data Mining

Definitions, Characteristics, and Benefits

How Data Mining Works

Application Case 4.2 American Honda Uses Advanced Analytics to Improve Warranty Claims

Data Mining versus Statistics

4.3 Data Mining Applications

Application Case 4.3 Predictive Analytic and Data Mining Help Stop Terrorist Funding

4.4 Data Mining Process

Step 1: Business Understanding

Step 2: Data Understanding

Step 3: Data Preparation

Step 4: Model Building

Application Case 4.4 Data Mining Helps in Cancer Research

Step 5: Testing and Evaluation

Step 6: Deployment

Other Data Mining Standardized Processes and Methodologies

4.5 Data Mining Methods

Classification

Estimating the True Accuracy of Classification

Models

Estimating the Relative Importance of Predictor

Variables

Cluster Analysis for Data Mining

Application Case 4.5 Influence Health Uses Advanced Predictive Analytics to Focus on the Factors That Really Influence Peoples Healthcare Decisions

Association Rule Mining

4.6 Data Mining Software Tools

Application Case 4.6 Data Mining Goes to Hollywood: Predicting Financial Success of Movies

4.7 Data Mining Privacy Issues, Myths, and

Blunders

Application Case 4.7 Predicting Customer Buying PatternsThe Target Story

Data Mining Myths and Blunders

Chapter Highlights

Key Terms

Questions for Discussion

Exercises

References

Table of Contents

Chapter 5 Machine-Learning Techniques for Predictive Analytics

5.1 Opening Vignette: Predictive Modeling Helps Better Understand and Manage Complex Medical Procedures

5.2 Basic Concepts of Neural Networks

Biological versus Artificial Neural Networks

Application Case 5.1 Neural Networks Are Helping to Save Lives in the Mining Industry

5.3 Neural Network Architectures

Kohonen's Self-Organizing Feature Maps
Hopfield Networks

Application Case 5.2 Predictive Modeling Is Powering the Power Generators

5.4 Support Vector Machines

Application Case 5.3 Identifying Injury Severity Risk Factors in Vehicle Crashes with Predictive Analytics
Mathematical Formulation of SVM
Primal Form
Dual Form
Soft Margin
Nonlinear Classification
Kernel Trick

5.5 Process-Based Approach to the Use of SVM

Support Vector Machines versus Artificial Neural Networks

5.6 Nearest Neighbor Method for Prediction

Similarity Measure: The Distance Metric
Parameter Selection

Application Case 5.4 Efficient Image Recognition and Categorization with knn

5.7 Naïve Bayes Method for Classification

Bayes Theorem
Naïve Bayes Classifier
Process of Developing a Naïve Bayes Classifier
Testing Phase

Application Case 5.5 Predicting Disease Progress in Crohns Disease Patients: A Comparison of Analytics Methods

5.8 Bayesian Networks

How Does BN Work
How Can BN Be Constructed

Table of Contents

5.9 Ensemble Modeling

Motivation—Why Do We Need to Use

Ensembles

Different Types of Ensembles

Bagging

Boosting

Variants of Bagging and Boosting

Stacking

Information Fusion

Summary—Ensembles Are Not Perfect

Application Case 5.6 To Imprison or Not to Imprison: A Predictive Analytics-Based Decision Support System for Drug Courts

Chapter Highlights

Key Terms

Questions for Discussion

Exercises

Internet Exercises

References

Chapter 6 Deep Learning and Cognitive Computing

6.1 Opening Vignette: Fighting Fraud with Deep Learning and Artificial Intelligence

6.2 Introduction to Deep Learning

Application Case 6.1 Finding the Next Football Star with Artificial Intelligence

6.3 Basics of “Shallow” Neural Networks

Application Case 6.2 Gaming Companies Use Data Analytics to Score Points with Players

Application Case 6.3 Artificial Intelligence Helps Protect Animals from Extinction

6.4 Process of Developing Neural Network-Based Systems

Learning Process in ANN

Backpropagation for ANN Training

6.5 Illuminating the Black Box of ANN

Application Case 6.4 Sensitivity Analysis Reveals Injury Severity Factors in Traffic Accidents

6.6 Deep Neural Networks

Feedforward Multilayer Perceptron (MLP)-Type Deep Networks

Impact of Random Weights in Deep MLP

More Hidden Layers versus More

Neurons

Application Case 6.5 Georgia DOT Variable Speed Limit Analytics Help Solve Traffic Congestions

Table of Contents

6.7 Convolutional Neural Networks

Convolution Function

Pooling

Image Processing Using Convolutional
Networks

Application Case 6.6 From Image Recognition to Face Recognition

Text Processing Using Convolutional
Networks

6.8 Recurrent Networks and Long Short-Term Memory Networks

Application Case 6.7 Deliver Innovation by Understanding Customer Sentiments

LSTM Networks Applications

6.9 Computer Frameworks for Implementation of Deep Learning

Torch

Caffe

TensorFlow

Theano

Keras: An Application Programming
Interface

6.10 Cognitive Computing

How Does Cognitive Computing Work

How Does Cognitive Computing Differ from
AI

Cognitive Search

IBM Watson: Analytics at Its Best

Application Case 6.8 IBM Watson Competes against the Best at Jeopardy

How Does Watson Do It

What Is the Future for Watson

Chapter Highlights

Key Terms

Questions for Discussion

Exercises

References

Chapter 7 Text Mining, Sentiment Analysis, and Social Analytics

7.1 Opening Vignette: Amadori Group Converts Consumer Sentiments into
Near-Real-Time Sales

7.2 Text Analytics and Text Mining

Overview

Application Case 7.1 Netflix: Using Big Data to Drive Big Engagement: Unlocking
the Power of Analytics to Drive Content and Consumer Insight

7.3 Natural Language Processing (NLP)

Application Case 7.2 AMC Networks Is Using Analytics to Capture New Viewers,
Predict Ratings, and Add Value for Advertisers in a Multichannel World

7.4 Text Mining Applications

Marketing Applications

Security Applications

Table of Contents

Biomedical Applications

Application Case 7.3 Mining for Lies

Academic Applications

Application Case 7.4 The Magic behind the Magic: Instant Access to Information
Helps the Orlando Magic Up Their Game and the Fans Experience

7.5 Text Mining Process

Task 1: Establish the Corpus

Task 2: Create the Term–Document

Matrix

Task 3: Extract the Knowledge

Application Case 7.5 Research Literature Survey with Text Mining

7.6 Sentiment Analysis

Application Case 7.6 Creating a Unique Digital Experience to Capture Moments
That Matter at Wimbledon

Sentiment Analysis Applications

Sentiment Analysis Process

Methods for Polarity Identification

Using a Lexicon

Using a Collection of Training

Documents

Identifying Semantic Orientation of Sentences and
Phrases

Identifying Semantic Orientation of
Documents

7.7 Web Mining Overview

Web Content and Web Structure Mining

7.8 Search Engines

Anatomy of a Search Engine

1. Development Cycle

2. Response Cycle

Search Engine Optimization

Methods for Search Engine

Optimization

Application Case 7.7 Delivering Individualized Content and Driving Digital
Engagement: How Barbour Collected More Than 49,000 New Leads in One Month with
Teradata Interactive

7.9 Web Usage Mining (Web Analytics)

Web Analytics Technologies

Web Analytics Metrics

Web Site Usability

Traffic Sources

Visitor Profiles

Conversion Statistics

7.10 Social Analytics

Social Network Analysis

Social Network Analysis Metrics

Application Case 7.8 Titos Vodka Establishes Brand Loyalty with an Authentic

Table of Contents

Social Strategy

Connections

Distributions

Segmentation

Social Media Analytics

How Do People Use Social Media

Measuring the Social Media Impact

Best Practices in Social Media

Analytics

Chapter Highlights

Key Terms

Questions for Discussion

Exercises

References

PART III Prescriptive Analytics and Big Data

Chapter 8 Prescriptive Analytics: Optimization and Simulation

8.1 Opening Vignette: School District of Philadelphia Uses Prescriptive Analytics to Find Optimal Solution for Awarding Bus Route Contracts

8.2 Model-Based Decision Making

Application Case 8.1 Canadian Football League Optimizes Game Schedule

Prescriptive Analytics Model

Examples

Identification of the Problem and Environmental

Analysis

Application Case 8.2 Ingram Micro Uses Business Intelligence Applications to

Make Pricing Decisions

Model Categories

8.3 Structure of Mathematical Models for Decision

Support

The Components of Decision Support Mathematical Models

The Structure of Mathematical Models

8.4 Certainty, Uncertainty, and Risk

Decision Making under Certainty

Decision Making under Uncertainty

Decision Making under Risk (Risk Analysis)

Application Case 8.3 American Airlines Uses Should-Cost Modeling to Assess the Uncertainty of Bids for Shipment Routes

8.5 Decision Modeling with Spreadsheets

Application Case 8.4 Pennsylvania Adoption Exchange Uses Spreadsheet Model to Better Match Children with Families

Application Case 8.5 Metro Meals on Wheels Treasure Valley Uses Excel to Find

Table of Contents

Optimal Delivery Routes

8.6 Mathematical Programming

Optimization

Application Case 8.6 Mixed-Integer Programming Model Helps the University of Tennessee Medical Center with Scheduling Physicians

Linear Programming Model

Modeling in LP: An Example

Implementation

8.7 Multiple Goals, Sensitivity Analysis, What-If Analysis, and Goal Seeking

Multiple Goals

Sensitivity Analysis

What-If Analysis

Goal Seeking

8.8 Decision Analysis with Decision Tables and Decision Trees

Decision Tables

Decision Trees

8.9 Introduction to Simulation

Major Characteristics of Simulation

Application Case 8.7 Steel Tubing Manufacturer Uses a Simulation-Based Production Scheduling System

Advantages of Simulation

Disadvantages of Simulation

The Methodology of Simulation

Simulation Types

Monte Carlo Simulation

Discrete Event Simulation

Application Case 8.8 Cosan Improves Its Renewable Energy Supply Chain Using Simulation

8.10 Visual Interactive Simulation

Conventional Simulation Inadequacies

Visual Interactive Simulation

Visual Interactive Models and DSS

Simulation Software

Application Case 8.9 Improving Job-Shop Scheduling Decisions through RFID: A Simulation-Based Assessment

Chapter Highlights

Key Terms

Questions for Discussion

Exercises

References

Chapter 9 Big Data, Cloud Computing, and Location Analytics: Concepts and Tools

9.1 Opening Vignette: Analyzing Customer Churn in a Telecom Company Using Big Data Methods

9.2 Definition of Big Data

The “V”s That Define Big Data

Application Case 9.1 Alternative Data for Market Analysis or Forecasts

Table of Contents

9.3 Fundamentals of Big Data

Analytics

- Business Problems Addressed by Big Data
- Analytics

Application Case 9.2 Big Data and Retail Business: The Rise of ABEJA

9.4 Big Data Technologies

- MapReduce
- Why Use MapReduce
- Hadoop
- How Does Hadoop Work
- Hadoop Technical Components
- Hadoop: The Pros and Cons
- NoSQL

Application Case 9.3 eBays Big Data Solution

Application Case 9.4 Understanding Quality and Reliability of Healthcare Support Information on Twitter

9.5 Big Data and Data Warehousing

- Use Cases for Hadoop
- Use Cases for Data Warehousing
- The Gray Areas (Any One of the Two Would Do the Job)
- Coexistence of Hadoop and Data Warehouse

9.6 In-Memory Analytics and Apache

Spark

- Application Case 9.5 Databricks Apache Spark™: Asia-Pacific Big Data Processing in Action
- Architecture of Apache Spark™
- Getting Started with Apache Spark™

9.7 Big Data and Stream Analytics

- Stream Analytics versus Perpetual Analytics
- Critical Event Processing
- Data Stream Mining
- Applications of Stream Analytics
- e-Commerce
- Telecommunications
- Application Case 9.6 Salesforce Is Using Streaming Data to Enhance Customer Value
- Law Enforcement and Cybersecurity
- Power Industry
- Financial Services
- Health Sciences
- Government

9.8 Big Data Vendors and Platforms

- Infrastructure Services Providers
- Analytics Solution Providers
- Business Intelligence Providers Incorporating Big

Table of Contents

Data

Application Case 9.7 Using Social Media for Nowcasting Flu Activity

Application Case 9.8 Analyzing Disease Patterns from an Electronic Medical Records Data Warehouse

9.9 Cloud Computing and Business

Analytics

Data as a Service (DaaS)

Software as a Service (SaaS)

Platform as a Service (PaaS)

Infrastructure as a Service (IaaS)

Essential Technologies for Cloud

Computing

Application Case 9.9 Major West Coast Utility Uses Cloud-Mobile Technology to Provide Real-Time Incident Reporting

Cloud Deployment Models

Major Cloud Platform Providers in

Analytics

Analytics as a Service (AaaS)

Representative Analytics as a Service

Offerings

Illustrative Analytics Applications Employing the Cloud

Infrastructure

Using Azure IOT, Stream Analytics, and Machine Learning to Improve Mobile Health Care Services

Gulf Air Uses Big Data to Get Deeper Customer

Insight

Chime Enhances Customer Experience Using

Snowflake

9.10 Location-Based Analytics for Organizations

Geospatial Analytics

Application Case 9.10 GIS and the Indian Retail Industry

Application Case 9.11 Starbucks Exploits GIS and Analytics to Grow Worldwide

Real-Time Location Intelligence

Analytics Applications for Consumers

Chapter Highlights

Key Terms

Questions for Discussion

Exercises

References

PART IV Robotics, Social Networks, AI, and IoT

Chapter 10 Robotics: Industrial and Consumer Applications

10.1 Opening Vignette: Robots Provide Emotional Support to Patients and Children

Table of Contents

10.2 Overview of Robotics

10.3 History of Robotics

10.4 Illustrative Applications of
Robotics

 Changing Precision Technology

 Adidas

 BMW Employs Collaborative Robots

 Tega

 San Francisco Burger Eatery

 Spyce

 Mahindra & Mahindra Ltd

 Robots in the Defense Industry

 Pepper

 Da Vinci Surgical System

 Snoo—A Robotic Crib

 MEDI

 Care-E Robot

 AGROBOT

10.5 Components of Robots

10.6 Various Categories of Robots

10.7 Autonomous Cars: Robots in
Motion

 Autonomous Vehicle Development

 Issues with Self-Driving Cars

10.8 Impact of Robots on Current and Future
Jobs

10.9 Legal Implications of Robots and Artificial
Intelligence

 Tort Liability

 Patents

 Property

 Taxation

 Practice of Law

 Constitutional Law

 Professional Certification

 Law Enforcement

Chapter Highlights

Key Terms

Questions for Discussion

Exercises

References

Chapter 11 Group Decision Making, Collaborative Systems, and AI
Support

11.1 Opening Vignette: Hendrick Motorsports Excels with Collaborative Teams

11.2 Making Decisions in Groups: Characteristics, Process, Benefits, and

Table of Contents

Dysfunctions

Characteristics of Group Work

Types of Decisions Made by Groups

Group Decision-Making Process

Benefits and Limitations of Group

Work

11.3 Supporting Group Work and Team Collaboration with Computerized Systems

Overview of Group Support Systems (GSS)

Time/Place Framework

Group Collaboration for Decision

Support

11.4 Electronic Support for Group Communication and Collaboration

Groupware for Group Collaboration

Synchronous versus Asynchronous

Products

Virtual Meeting Systems

Collaborative Networks and Hubs

Collaborative Hubs

Social Collaboration

Sample of Popular Collaboration

Software

11.5 Direct Computerized Support for Group Decision Making

Group Decision Support Systems (GDSS)

Characteristics of GDSS

Supporting the Entire Decision-Making

Process

Brainstorming for Idea Generation and Problem

Solving

Group Support Systems

11.6 Collective Intelligence and Collaborative

Intelligence

Definitions and Benefits

Computerized Support to Collective

Intelligence

Application Case 11.1 Collaborative Modeling for Optimal Water Management: The

Oregon State University Project

How Collective Intelligence May Change Work and

Life

Collaborative Intelligence

How to Create Business Value from Collaboration: The IBM Study

11.7 Crowdsourcing as a Method for Decision

Support

The Essentials of Crowdsourcing

Crowdsourcing for Problem-Solving and Decision

Support

Implementing Crowdsourcing for Problem

Solving

Application Case 11.2 How InnoCentive Helped GSK Solve a Difficult Problem

Table of Contents

11.8 Artificial Intelligence and Swarm AI Support of Team Collaboration and Group Decision Making

- AI Support of Group Decision Making
- AI Support of Team Collaboration
- Swarm Intelligence and Swarm AI

Application Case 11.3 XPRIZE Optimizes Visioneering

11.9 Human–Machine Collaboration and Teams of Robots

- Human–Machine Collaboration in Cognitive Jobs
- Robots as Coworkers: Opportunities and Challenges
- Teams of collaborating Robots

Chapter Highlights

Key Terms

Questions for Discussion

Exercises

Chapter 12 Knowledge Systems: Expert Systems, Recommenders, Chatbots, Virtual Personal Assistants, and Robo Advisors

12.1 Opening Vignette: Sephora Excels with Chatbots

12.2 Expert Systems and Recommenders

- Basic Concepts of Expert Systems (ES)
- Characteristics and Benefits of ES
- Typical Areas for ES Applications
- Structure and Process of ES
- Application Case 12.1 ES Aid in Identification of Chemical, Biological, and Radiological Agents
- Why the Classical Type of ES Is Disappearing
- Application Case 12.2 VisiRule
- Recommendation Systems

Application Case 12.3 Netflix Recommender: A Critical Success Factor

12.3 Concepts, Drivers, and Benefits of Chatbots

- What Is a Chatbot
- Chatbot Evolution
- Components of Chatbots and the Process of Their Use
- Drivers and Benefits
- Representative Chatbots from around the World

12.4 Enterprise Chatbots

- The Interest of Enterprises in Chatbots

Table of Contents

Enterprise Chatbots: Marketing and Customer Experience

Application Case 12.4 WeChats Super Chatbot

Application Case 12.5 How Vera Gold Mark Uses Chatbots to Increase Sales

Enterprise Chatbots: Financial Services

Enterprise Chatbots: Service Industries

Chatbot Platforms

Application Case 12.6 Transavia Airlines Uses Bots for Communication and Customer Care Delivery

Knowledge for Enterprise Chatbots

12.5 Virtual Personal Assistants

Assistant for Information Search

If You Were Mark Zuckerberg, Facebook CEO

Amazon's Alexa and Echo

Apple's Siri

Google Assistant

Other Personal Assistants

Competition among Large Tech Companies

Knowledge for Virtual Personal Assistants

12.6 Chatbots as Professional Advisors (Robo Advisors)

Robo Financial Advisors

Evolution of Financial Robo Advisors

Robo Advisors 2.0: Adding the Human Touch

Application Case 12.7 Barclays: AI and Chatbots in Banking

Managing Mutual Funds Using AI

Other Professional Advisors

IBM Watson

12.7 Implementation Issues

Technology Issues

Disadvantages and Limitations of Bots

Quality of Chatbots

Setting Up Alexa's Smart Home System

Constructing Bots

Chapter 13 The Internet of Things as a Platform for Intelligent

Table of Contents

Applications

13.1 Opening Vignette: CNH Industrial Uses the Internet of Things to Excel

13.2 Essentials of IoT

Definitions and Characteristics

The IoT Ecosystem

Structure of IoT Systems

13.3 Major Benefits and Drivers of IoT

Major Benefits of IoT

Major Drivers of IoT

Opportunities

13.4 How IoT Works

IoT and Decision Support

13.5 Sensors and Their Role in IoT

Brief Introduction to Sensor

Technology

Application Case 13.1 Using Sensors, IoT, and AI for Environmental Control at the Athens International Airport

How Sensors Work with IoT

Application Case 13.2 Rockwell Automation Monitors Expensive Oil and Gas Exploration Assets to Predict Failures

Sensor Applications and Radio-Frequency Identification (RFID)

Sensors

13.6 Selected IoT Applications

A Large-Scale IoT in Action

Examples of Other Existing

Applications

13.7 Smart Homes and Appliances

Typical Components of Smart Homes

Smart Appliances

A Smart Home Is Where the Bot Is

Barriers to Smart Home Adoption

13.8 Smart Cities and Factories

Application Case 13.3 Amsterdam on the Road to Become a Smart City

Smart Buildings: From Automated to Cognitive Buildings

Smart Components in Smart Cities and Smart Factories

Application Case 13.4 How IBM Is Making Cities Smarter Worldwide

Improving Transportation in the Smart City

Combining Analytics and IoT in Smart City Initiatives

Bill Gates' Futuristic Smart City

Technology Support for Smart Cities

13.9 Autonomous (Self-Driving)

Table of Contents

Vehicles

The Developments of Smart Vehicles

Application Case 13.5 Waymo and Autonomous Vehicles

Flying Cars

Implementation Issues in Autonomous
Vehicles

13.10 Implementing IoT and Managerial Considerations

Major Implementation Issues

Strategy for Turning Industrial IoT into Competitive
Advantage

The Future of the IoT

PART V Caveats of Analytics and AI

Chapter 14 Implementation Issues: From Ethics and Privacy to Organizational and Societal Impacts

14.1 Opening Vignette: Why Did Uber Pay \$245 Million to Waymo

14.2 Implementing Intelligent Systems: An
Overview

The Intelligent Systems Implementation
Process

The Impacts of Intelligent Systems

14.3 Legal, Privacy, and Ethical
Issues

Legal Issues

Privacy Issues

Who Owns Our Private Data

Ethics Issues

Ethical Issues of Intelligent
Systems

Other Topics in Intelligent Systems
Ethics

14.4 Successful Deployment of Intelligent
Systems

Top Management and Implementation

System Development Implementation
Issues

Connectivity and Integration

Security Protection

Leveraging Intelligent Systems in
Business

Intelligent System Adoption

Table of Contents

14.5 Impacts of Intelligent Systems on Organizations

New Organizational Units and Their Management

Transforming Businesses and Increasing Competitive Advantage

Application Case 14.1 How 1-800-Flowers.com Uses Intelligent Systems for Competitive Advantage

Redesign of an Organization through the Use of Analytics

Intelligent Systems' Impact on Managers' Activities, Performance, and Job Satisfaction
